Sub: Submission for Proposal for Consultancy Services for Feasibility Studies and Preparation of Detailed Design for the Following Phase of CEIP (CEIP-II)

Ref: Memo No.: CEIP-1/S23/ dated: 28-06-2020

Dear Sir,

AECOM-EPC JV in association with the local specialist consultant THAL is pleased to submit herewith its proposal for the subject project. We are eager to participate in the Government of Bangladesh's (GoB) effort to increase resilience of coastal population to natural disasters and climatic changes. This project will be implemented by Ministry of Water Resources (MoWR), through Bangladesh Water Development Board (BWDB) with funding aid from International Development Association (IDA).

AECOM is a global network of design, engineering, construction and management professionals partnering with clients to imagine and develop a better world. With several decades of experience, we have delivered a large number of complex projects globally, as both a stand-alone company and through joint ventures for coastal and marine projects as well as multiple port related projects. **AECOM-EPC** is uniquely positioned with its global presence and diversity of services delivered across the Globe. Having developed a stellar record of successfully delivering complex multi-dimensional projects, AECOM has established specialist expertise, in all phases of project development.

The Consultant will partner with the client to ascertain a sound and cost-effective solution considering the baseline condition, population, land availability, and optimal utilisation of existing resources.

We look forward to contributing to Bangladesh's Coastal Embankment Improvement, which would eventually contribute in social upliftment of Bangladesh Coastal population in near future.

Yours faithfully,

Neil Banerjee
